DETAILED ACTION

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 1, prior art fails to teach a dose of the ion implantation is lowered as the depth of formation of the separatory ion implanted layer measured from the ion implantation surface becomes less, the dose of the ion implantation being such that the separation surface of the bonded silicon single crystal film formed in the separation step has the roughness (Rms) of 4.5 nm or less. Claims 2-11 are dependent upon claim 1 and are therefore allowable.
